WHEEL POLISHING

# ≡ METALFINISH ≡

*"Our company stands out for its high flexibility and efficiency in developing job orders, and in our ability to provide customised and additional processes.*

*This has brought us a large portfolio of major national customers who demand an efficient and prompt service for even the smallest orders.*

*Our lead time calculation system enables us to schedule production based on bills of materials, work orders and actual costs.*

*We provide full transparency on order and cost management thereby ensuring that agreed delivery times are met."*

*Ferdinando De Facci*

# WHO WE ARE

Metal Finish srl is synonymous with “mass finishing”, the term used to denote a series of manufacturing processes that permit large quantities of different types of metal parts to be finished simultaneously.

The company occupies an area of 2500 m<sup>2</sup>, including a covered area of 1600 m<sup>2</sup> and our cutting edge equipment enables us to offer customers a range of solutions for quality finishes. “We also boast 30 automated vibratory machines with integrated washing and drying systems”.

Metal Finish srl is certified to UNI EN ISO 9001:2015.

## WHEEL POLISHING

We carry out industrial wheel polishing using the Ball Polish system. We are the only Italian company doing this type of work. The specialized machinery we use ensures each individual part of the wheel is polished to a high-lustre finish.

Our company aims to keep growing in this market, so as to become a key partner in a process where customer satisfaction is king.

We offer the following services:

- Ball Polish
- Bi-Color Polish

We are equipped with 18 systems, which enable us to produce 16,000 wheels (year 2022) with a perspective of 30,000 (for 2024/2025). All the wheels produced are 100% checked before delivery to the customer.

# THE BALL POLISH SYSTEM

# OUR CERTIFICATIONS

Metal Finish srl is certified to UNI EN ISO 9001:2015.

For us, certification is both a goal and a starting point for optimising company procedures in order to guarantee the quality of our work.

Now we also use the 6S method.

*"We intentionally made ours a hand-crafted company operating with industrial manufacturing systems, ensuring continuous standardized quality for each order. Without fail."*

*Ferdinando De Facci*
