WHEEL POLISHING

≡ METALFINISH ≡

"Our company stands out for its high flexibility and efficiency in developing job orders, and in our ability to provide customised and additional processes.

This has brought us a large portfolio of major national customers who demand an efficient and prompt service for even the smallest orders.

Our lead time calculation system enables us to schedule production based on bills of materials, work orders and actual costs.

We provide full transparency on order and cost management thereby ensuring that agreed delivery times are met."

WHO WE ARE

Metal Finish srl is synonymous with "mass finishing", the term used to denote a series of manufacturing processes that permit large quantities of different types of metal parts to be finished simultaneously.

The company occupies an area of 2500 m², including a covered area of 1600 m² and our cutting edge equipment enables us to offer customers a range of solutions for quality finishes. "We also boast 30 automated vibratory machines with integrated washing and drying systems".

Metal Finish srl is certified to UNI EN ISO 9001:2008.

WHEEL POLISHING

We carry out industrial wheel polishing using the Ball Polish system. We are the only Italian company doing this type of work. The specialized machinery we use ensures each individual part of the wheel is polished to a high-lustre finish.

Our company aims to keep growing in this market, so as to become a key partner in a process where customer satisfaction is king.

We offer the following services:

- Ball Polish
- Bi-Color Polish

We are equipped with 18 systems, which enables us to produce 12 wheels in every 8-hour shift. All the wheels produced are subjected to a full quality control procedure before being delivered to the customer.

THE BALL POLISH SYSTEM

OUR CERTIFICATIONS

Metal Finish srl is certified to UNI EN ISO 9001:2015.

For us, certification is both a goal and a starting point for optimising company procedures in order to guarantee the quality of our work.

"We intentionally made ours a hand-crafted company operating with industrial manufacturing systems, ensuring continuous standardized quality for each order. Without fail."
